Origins and Evolution of British Lighthouses

Britain's lighthouses have a storied history dating back to the Roman era, with the first recorded lighthouse being the Tower of Alexandria in Egypt, which inspired early lighthouse designs across the Mediterranean and northern Europe. In Britain, the need for navigational aids became especially critical during the Middle Ages, as trade and naval activities expanded.

By the 17th and 18th centuries, lighthouse construction became more sophisticated with innovations in lighting technology, such as oil lamps and later, Fresnel lenses. The Trinity House, established in 1514, became the principal authority responsible for the safety of shipping and the maintenance of lighthouses in England, Wales, and the Channel Islands. Similarly, the Northern Lighthouse Board was founded in 1786 to oversee Scotland's lighthouses, reflecting the importance of maritime safety in the region.
